History of AutoCAD AutoCAD was developed by James E. Handy in 1982 and was released on 12 December 1982 as a desktop application running on the Xerox X-Windows system on a personal computer. Handy received a patent for the core drafting features in 1982, which were later included in most later versions of AutoCAD. AutoCAD was named by a writer for the United States Patent and Trademark Office (USPTO) after the name of the first cadastral surveyor of the United States, Guilford Benjamin Adams (1851-1881). The original release of AutoCAD (AutoCAD 1.0) was titled CADent, with the addition of the name AutoCAD later in development.
